Deep Brain Stimulation for Obsessive Compulsive Disorder Reduces Symptoms of Irritable Bowel Syndrome in a Single Patient

Berthold Langguth, Kornelia Sturm, Thomas C. Wetter, Max Lange, Loes Gabriels, Emeran A. Mayer, Juergen Schlaier

PII: S1542-3565(15)00109-3
DOI: [10.1016/j.cgh.2015.01.023](https://doi.org/10.1016/j.cgh.2015.01.023)
Reference: YJCGH 54153

To appear in: *Clinical Gastroenterology and Hepatology*
Accepted Date: 11 January 2015

Please cite this article as: Langguth B, Sturm K, Wetter TC, Lange M, Gabriels L, Mayer EA, Schlaier J, Deep Brain Stimulation for Obsessive Compulsive Disorder Reduces Symptoms of Irritable Bowel Syndrome in a Single Patient, *Clinical Gastroenterology and Hepatology* (2015), doi: 10.1016/j.cgh.2015.01.023.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

All studies published in *Clinical Gastroenterology and Hepatology* are embargoed until 3PM ET of the day they are published as corrected proofs on-line. Studies cannot be publicized as accepted manuscripts or uncorrected proofs.

Title: Deep Brain Stimulation for Obsessive Compulsive Disorder Reduces Symptoms of Irritable Bowel Syndrome in a Single Patient

Langguth Berthold¹, Sturm Kornelia¹, Wetter Thomas C¹, Lange Max², Gabriels Loes³, Mayer Emeran A⁴, Schlaier Juergen²
