This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

CHOLESTATIC PHENOTYPES OF AUTOIMMUNE HEPATITIS

Albert J. Czaja, M.D.

Manuscript number: CGH-D-13-00932.R1

Running head: Cholestatic phenotypes of autoimmune hepatitis

Keywords: autoimmune hepatitis; cholestasis; atypical phenotypes; overlap

Word count: abstract, 227; text, 5830 (including abstract, figure and table legends, and references)

Content: 4 tables; 2 figures; 81 references; 30 pages.

From the Division of Gastroenterology and Hepatology, Mayo Clinic College of Medicine, Rochester, Minnesota USA.

This review did not receive financial support from a funding agency or institution, and Albert J. Czaja, MD has no conflict of interests to declare. Albert J. Czaja, MD determined the theme of this manuscript, designed its format, reviewed the literature, selected the pertinent studies, drafted the manuscript, critically reviewed and revised its content, provided the photomicrographs from his own collection, typed the document, approved the final version, and submitted the manuscript for review. He received no writing or research assistance.

Presented in part at the Annual Postgraduate Course of the American College of Gastroenterology, October 12, 2013, San Diego, California.
