

SUBJECT INDEX TO VOLUME 130

Abdominal bloating, relation to abdominal wall dystony and viscerosomatic reflexes, 130:1062

Abdominal wall, dystony of, relation to abdominal bloating, 130:1062

Acetaminophen-protein adducts, serum, measurement in ALF patients, 130:687, 130:1933 *correction*

Acute liver failure (ALF), serum acetaminophen-protein adducts for diagnosis of, 130:687, 130:1933 *correction*

Adalimumab, efficacy for moderate to severe CD, CLASSIC-I Trial, 130:289–tmig, 130:323, 130:1929–c

Adenocarcinoma, impact of *FANCC* and *FANCG* on therapeutic options for, 130:2147

Afferent neural circuitry, hypersensitivity in IBS patients, 130:1–tmig

Age
 impact on FGID, 130:1435
 and incidence of *H pylori* infection in children, 130:2–tmig, 130:65
 as predictor of disabling CD, 130:625–tmig, 130:650

Aging, of the population, effects on gastroenterology practice, education and research, 130:1371–c

AIH-2. See Autoimmune hepatitis type 2

Akt, signaling in colon adenocarcinoma, activation by Reg IV, 130:137

Alcohol, role of plasminogen activator inhibitor-1 in metformin prevention of liver injury caused by (mouse), 130:2101, 130:2236–e

Alcohol use, effects on outcomes of HCV treated with interferon plus ribavirin, 130:1607, 130:1912–e

American Cancer Society, guidelines for colonoscopic surveillance for colorectal cancer
 after polypectomy, 130:1872–srr
 after resection, 130:1865–srr

American Gastroenterological Association
 advanced imaging and technology in gastrointestinal neoplasia: summary of the AGA-NCI Symposium October 4–5, 2004, 130:1333–srr
 corticosteroids, immunomodulators, and infliximab in inflammatory bowel disease
 medical position statement on, 130:935
 technical review on, 130:940
 Digestive Disease Week highlights, 130:1027–gn
 medical position statement on management
 of gastric subepithelial masses, 130:2217
 of hepatitis C, 130:225, 130:1018 *correction*
 new journal CME programs launched, 130:5–gn
 new president—Mark Donowitz, MD, 130:1904
 presentation of the Julius M. Friedenberg medal to Norton J. Greenberger, MD, 130:2212
 return of GI fellowship match, 130:292–gn
 Robert Sandler, elected vice president, 130:628–gn
 success of new gastroenterology fellowship match, 130:218
 technical review on management
 of gastric subepithelial masses, 130:2219
 of hepatitis C, 130:231

Anemia, iron-deficiency, treatment of, 130:1367–ss

Aneurysm, of left gastric artery, 130:7–im

Angiogenesis, role in IBD pathogenesis, 130:1937–tmig, 130:2062

Anion exchanger SLC26A6, role in PGE₂-, forskolin-, and carbachol-induced duodenal HCO₃⁻ secretion (mice), 130:349

Annular pancreas, 130:295–im

Anorectal disorders, complex, 130:1927–pmr

Antibiotics, role in small intestinal bacterial overgrowth, 130:S78

Antidepressants, effect on susceptibility to colitis in depression (mouse), 130:1743

Anti-*Escherichia coli* outer membrane porin C (anti-OmpC), expression in relatives of patients with CD, 130:1078

Antigen-presenting cells (APCs), in experimental colitis, effect of CD48 (mice), 130:424

Antigens, of enteric bacteria, mucosal compartmentation of immune response to (mouse), 130:2052

anti-OmpC. See Anti-*Escherichia coli* outer membrane porin C

Anti-*Saccharomyces cerevisiae* antibodies (ASCs), in CD, *Candida albicans* as immunogen for, 130:1764

AP-1, signaling in colon adenocarcinoma, activation by Reg IV, 130:137

APCs. See Antigen-presenting cells

Apoptosis
 Fas-mediated, role of Flip in resistance of CD LPLs to, 130:389
 during intestinal adaptation, effect of EGFR signaling on (mice), 130:412
 relation to interaction between Bin1 and SH3 of HCV NS5A protein, 130:794, 130:995–e
 resistance to Fas-induced, and Bid phosphorylation during chronic cholestasis (mice), 130:104

Argininosuccinate lyase deficiency, sustained engraftment and tissue enzyme activity after hepatocyte transplantation, 130:1317–cr

ASCs. See Anti-*Saccharomyces cerevisiae* antibodies

Ascites
 refractory, TIPS for, 130:1372–c
 and renal dysfunction in liver disease, 130:2247–pmr

ATP7B. See Wilson protein

ATP synthesis, loss of, pancreatic calcium toxicity caused by fatty acid ethyl esters via (mouse), 130:781, 130:992–e

ATRA. See All-trans retinoic acid

Autocrine mechanism, VEGF stimulates cholangiocyte proliferation via (rat), 130:1270

Autoimmune hepatitis type 2 (AIH-2), relation to polyclonal

 srr—Special Reports and Reviews
 tmig—This Month in Gastroenterology
 vidd—Viewpoints in Digestive Diseases

- T-cell responses to CYP2D6, 130:868
- Autologous gastrointestinal reconstruction**, for short bowel syndrome, 130:S138
- Avian influenza, pledges to fight pandemic**, 130:628–gn
- Azathioprine**
for IBD treatment
AGAI medical position statement, 130:935–aga
AGAI technical review, 130:940–aga
versus mesalamine, for steroid-dependent UC, 130:607–ss
or 6-mercaptopurine
lymphoma risk in IBD patients treated with, 130:1363–ss
plus infliximab, for steroid-dependent CD, 130:1024–tmig, 130:1054, 130:1354–e
- Bacterial adhesion and invasion**, in CECs, role of CHI3L1 (mice), 130:290–tmig, 130:398
- Bacterial colonization**, influence in development of NEC (pigs), 130:1776
- Bacterial overgrowth**
caused by TPN in short bowel syndrome and intestinal failure patients, 130:S67–e
small intestinal, role of antibiotics, prebiotics, and probiotics in, 130:S78
- Banding ligation**, for primary prophylaxis against variceal bleeding, 130:275–ss
- Bariatric surgery**
Medicare proposes new coverage policy for, 130:293–gn
and obesity
and gastroenterology, 130:630–cc
and NAFLD, 130:1848
relation of insulin resistance to severe steatosis after, 130:1617
- Barrett's esophagus**, prevalence of, 130:1373–c
- Bax**, expression during intestinal adaptation, effect of EGFR signaling on (mice), 130:412
- b-blockers**
for cirrhosis prophylaxis, 130:1005–ss
effects on exercise capacity and hemodynamics in portopulmonary hypertension patients, 130:120
for primary prophylaxis against variceal bleeding, 130:275–ss
- Bcl-w**, expression during intestinal adaptation, effect of EGFR signaling on (mice), 130:412
- BDNF. See Brain-derived neurotrophic factor**
- Bicarbonate (HCO_3^-)**, role of CFTR and SLC26A6 in PGE_2 -, forskolin-, and carbachol-induced duodenal secretion of (mice), 130:349
- Bid**, phosphorylation of, and resistance to Fas-induced apoptosis during chronic cholestasis (mice), 130:104
- Bile**, metabolism, role of *FATP5* deletion (mouse), 130:1245
- Bile acids**
conjugation, role of *FATP5* deletion (mice), 130:1024–tmig, 130:1259
in induction of ectopic expression of intestinal GC-C via NF- κ B and Cdx2 in human esophageal cells, 130:1191
role in ileal damage during experimental NEC (rats), 130:359
- Bile duct**, stones in. *See* Choledocholithiasis
- Biliary papillomatosis**, 130:1563–im
- Biliary tract**
growth in cholestasis, modulation by opioid receptors, 130:1831
role of ATP7B in copper excretion by, 130:493
- Bin1**, interaction with SH3 of HCV NS5A protein, relation to apoptosis and infectivity, 130:794, 130:995–e
- Biofeedback**, versus laxatives, effectiveness for PFD, 130:625–tmig, 130:657
- Bitter taste perception**, T2R receptors for, 130:611–ss
- Bleeding. See Variceal bleeding**
- Blood flow**, mediation by GLP-2 receptor and vasoactive peptides in enteric neurons and endocrine cells, 130:150, 130:1019 *correction*
- Body mass index**, relation to NAFLD, 130:2025
- Body weight**, homeostasis in vivo, role of *FATP5* deletion (mice), 130:1024–tmig, 130:1259
- Bone marrow**, functional contribution in liver fibrosis (mouse), 130:1807
- Brain-derived neurotrophic factor (BDNF)**, to enhance peristalsis via release of 5-HT and CGRP (rat, mouse), 130:771
- Brooke**, Bryan Nicholas, 130:1561
- Budd-Chiari syndrome**, prevalence of *JAK2* tyrosine kinase mutation V617F, 130:2033
- Calcineurin inhibitors**, for IBD treatment, AGAI technical review, 130:940–aga
- Calcitonin gene-related peptide (CGRP)**, BDNF enhances peristalsis via release of (rat, mouse), 130:771
- Calcium**, pancreatic toxicity caused by fatty acid ethyl esters via inositol triphosphate receptors and loss of ATP synthesis (mouse), 130:781, 130:992–e
- Canalicular transporter genes**, role in pathophysiology of rare disease, 130:908–srr
- Cancer**
colorectal. *See* Colorectal cancer
endometrial. *See* Endometrial cancer
esophageal. *See* Esophageal cancer
gastric. *See* Gastric cancer
gastrointestinal. *See* Gastrointestinal cancer
health care, CMS selects demonstration sites to reduce disparities in, 130:1559–gn
human, impact of *FANCC* and *FANCG* on therapeutic options for, 130:2147
intestinal. *See* Intestinal cancer
pancreatic. *See* Pancreatic cancer
progression of NAFLD to, 130:207
- Candida albicans**, as immunogen for ASCAs in CD, 130:1764
- Carbachol**, role of CFTR and SLC26A6 in duodenal HCO_3^- secretion induced by (mice), 130:349
- Carcinoma**, intestinal, role of SCFAs in, 130:S100
- Cardia**, opening during gastric distention, in relation to transient lower esophageal sphincter relaxations, 130:89
- Cardiorespiratory fitness**, relation to NAFLD, 130:2025
- Carnitine palmitoyltransferase 1A (CPT1A) polymorphism**, relation to risk of advanced fibrosis in chronic HCV, 130:1679
- Case Reports**
Intestinal cholesterol absorption inhibitor ezetimibe added to cholestyramine for sitosterolemia and xanthomatosis, 130:1853
Liver transplantation in a patient with sitosterolemia and cirrhosis, 130:542
Mitochondrial neurogastrointestinal encephalomyopathy: evidence of mitochondrial DNA depletion in the small intestine, 130:893
