

Index

Note: Page numbers of article titles are in **boldface** type.

A

- Acute lymphoblastic leukemia, in India, 439–440
 - pediatric, global approach to, 420–424
 - core resources in low- and middle-income countries, 423
 - future directions, 423–424
 - incidence, 420
 - treatment and outcomes, 421–423
- Acute myelogenous leukemia, in India, 439–440
 - pediatric, global approach to, 424
- Acute promyelocytic leukemia, in China and Hong Kong, 451–453
 - revolution in treatment of, 451–453
 - all-trans retinoic acid, 451–452
 - arsenic trioxide, 452–453
- Africa, sub-Saharan, hematology in, **457–475**
 - blood transfusions in, 470–471, 483–484
 - bone marrow depression or aplasia, 465–466
 - hemostasis and thrombosis, 468–470
 - anticoagulation therapy, 469
 - coagulopathies, 468–469
 - hemophilia, 470
 - low prothrombin and vitamin K-dependent coagulation factors, 469–470
 - snake bite, 469
 - thromboembolic disease, 469
 - von Willebrand disease, 470
 - platelet disorders, 468
 - vascular purpura, 468
 - red cell disorders, 458–465
 - anemia, 458–459
 - hyperreactive malarial splenomegaly, 461
 - in pregnancy, 460–461
 - inherited red cell disorders, 461–462
 - iron deficiency anemia, 461
 - malaria causing anemia, 459–460
 - nutritional anemia, 464–465
 - sickle cell disease in, **343–358**, 462–463
 - bottlenecks in care of, 349–350
 - causes of death in children with, 346–349
 - bacteremia, 348–349
 - malaria, 346–348
 - future of, 349
 - future priorities for, 351
 - natural history of, 346

Africa (*continued*)

- origins of sickle mutation, 344–345
- present and future global burden, **327–341**
- specific treatments in, 351–352
- African trypanosomiasis, hematologic changes associated with, 408–409
- All-trans retinoic acid (ATRA), for acute promyelocytic leukemia treatment in China and Hong Kong, 451–453
- American trypanosomiasis, hematologic changes associated with, 408
- Anemia, estimating the global burden of, **247–308**
 - methods, 248–251
 - results, 251–301
 - summary and discussion, 301–304
- hemolytic, related to G6PD deficiency and, **373–393**
- in India, 434–435
 - nutritional, 434
 - other, 435
- in sub-Saharan Africa, 458–461
 - iron deficiency, 461
 - malaria and, 459–460
 - nutritional, 464–465
 - folate deficiency, 465
 - iron deficiency, 464
 - vitamin B₁₂ deficiency, 465
 - pregnancy and, 460–461
- iron deficiency, diagnosis and prevention at the population level, **309–325**
- malarial, 401–403
- prevalence and multiple causes in the developing world, 234–236
- Anthelmintic therapy, in prevention and control of anemia, 314
- Anticoagulation therapy, in sub-Saharan Africa, 469
- Aplasia, in sub-Saharan Africa, 465–466
- Aplastic anemia, geographic variability in distribution and expression of, 242
- Arsenic trioxide, for acute promyelocytic leukemia treatment in China and Hong Kong, 453–453
- Asia, control and management of thalassemias in, **369–371**
 - global issues, 369–370
 - in other regions of, 359–362
 - Thailand, 359–362

B

- Bacteremia, in children with sickle cell disease in sub-Saharan Africa, 348–349
- Bartonellosis, hematologic changes associated with, 410–411
- Blood disorders. *See* Hematologic disorders.
- Blood transfusion, hematology practice and, in sub-Saharan Africa, **457–475**
 - in developing countries, **477–495**
 - blood-borne infections, 478–479
 - improvements, 484–489
 - developing national transfusion service in Nigeria, 484–485
 - Ebola pandemic in West Africa, 488
 - in blood supply, 485–486
 - in clinical use of blood, 487–488
