

Index

Note: Page numbers of article titles are in **boldface** type.

A

- Anterior commissure, 210
- Anti-NMDA receptor encephalitis. See *Encephalitis, anti-NMDA receptor*.
- Arcuate fascicle, 205
- Association fibers, 204–209

B

- Brain, acute vascular insult in, and acute pediatric demyelination, differentiation of, 325–328
- Brain volume, measurement in children, methodological issues in, 340, 341
volumetry for measuring, methodology for, 339–340
- Brainstem fibers, 212–215
- Brainstem tracts, 212

C

- Central nervous system, acquired inflammatory disease of, and genetic disease of, distinguishing of, 328–330
malignancy of, and acquired demyelination, distinguishing of, 335–336
- Central nervous system infection, and inflammatory pediatric demyelination, distinguishing of, 330–331, 333, 334
- Central nervous system vasculitis, in childhood, **293–308**
primary, 294–302
 angiography-negative SV-c, 300–302
 angiography-positive NP-c, 294–298
 clinical features of, 294
 laboratory tests in, 294–295
 neuroimaging features of, 295–296
 angiography-positive P-c, 298–300
 etiopathogenesis of, 296
 management of, 297–298
 outcome of, 298
secondary, in rheumatic and systemic inflammatory diseases, 302–305
 in systemic diseases/exposures, 305
 infection-associated, 300
- Cerebellar peduncle, inferior, 213–215
 superior, 213
- Cerebrospinal venous insufficiency, chronic, in multiple sclerosis, 229

- Children, central nervous system vasculitis in, **293–308**
 magnetic resonance imaging in, unique considerations in, 218
 multiple sclerosis in. See *Multiple sclerosis, pediatric*.
- Cingulum, 210–211, 212
- Commissural fibers, 209–210
- Cord compression, extra-axial, 272
 in skeletal disorders, 275
- Corpus callosum, 209–210, 214
- Cortical imaging, in pediatric multiple sclerosis, 338–339
- Cortical lesions, in pediatric multiple sclerosis, detection of, 339
- Corticobulbar tracts, projection fibers in, 202
- Corticopontine tracts, projection fibers in, 202
- Corticospinal tract(s), 214
 projection fibers in, 198–201

D

- Demyelinating disease, pediatric, acquired, and multiple sclerosis, diagnostic evaluation of, 322
 diagnosis of, MR imaging flags for, 323
 typical features of, on MR imaging, 323
acute, and acute vascular insult in brain, differentiation of, 325–328
 and acute vascular spinal cord insult, differentiation of, 323–325
 clinical vignettes of, 324–325, 326–328
inflammatory, and CNS infection, distinguishing of, 330–331, 333, 334
magnetic resonance imaging reporting template for, 223
mimics and rare presentations of, **321–336**
standard lexicon magnetic resonance imaging in, 221–223
standard protocol magnetic resonance imaging in, 218–221
- Demyelinating disorders, relapsing, distinguishing different types of, 332–333
- Demyelination, acquired, and central nervous system malignancy, distinguishing of, 335–336
 and vitamin B12 deficiency, distinguishing of, 334–335
- Diffusion tensor imaging, 197–198
 in pediatric multiple sclerosis, 343–345

E

- Encephalitis, anti-NMDA receptor, **309–320**
 autonomic dysfunction in, 311
 cerebrospinal fluid and serum assessment in, 312–314
 clinical presentation of, 310–311
 cognitive problems in, 311
 differential diagnosis of, 315–316
 during pregnancy, 318
 electroencephalography in, 312
 epidemiology of, 310
 functional imaging in, 312
 immunopathology of, 315
 neuroimaging in, 311–312
 neurologic features of, 310–311
 outcome of, 317–318
 pathogenesis of, 314–315
 pearls, pitfalls, and variants of, 318
 physical examination in, 311
 prodromal features of, 310
 psychiatric features of, 310
 seizures in, 311
 treatment of, 316–317
 tumor association in, 314
- monophasic acute disseminated, computed tomography of brain in, 250
 differential diagnosis of, 256–259
 DT imaging in, 254
 DW imaging in, 253–254
 epidemiology and clinical presentation of, 246–248
 immunogenesis of, 248–249
 in children, quantitative parameters of, 252
 inflammatory cascade theory of, 249
 International MS Study Group criteria for, 246
 laboratory findings in, 250
 magnetic resonance imaging appearance of, **245–266**
 magnetic resonance imaging of brain and spine in, 250–252
 molecular mimicry theory of, 249
 MR spectroscopy in, 254–255
 MT imaging in, 253
 neuroimaging in, 250–255
 neurologic features of, 248
 PET and SPECT in, 255
 prognosis in, 259–260
 treatment of, 256–259
 variants of, 260
- Encephalomyelitis, monophasic acute disseminated, and relapsing-remitting multiple sclerosis, distinguishing of, 238

F

- Fasciculus. See specific fasciculus.
- Fibrocartilaginous embolization, 275–276

Fornix, 211

Functional magnetic resonance imaging, in pediatric multiple sclerosis, 348–349

G

Geniculocalcarine tract (optic radiation), projection fibers in, 203–204, 206

I

Internal capsule, projection fibers in, 202, 203

L

- Limbic system fibers, 210–211
- Longitudinal fasciculus, inferior, 206, 207, 208, 214
 middle, 206–207, 208
 superior, 204–205, 207, 208

M

- Magnetic resonance imaging, diagnostic criteria, for multiple sclerosis diagnosis, 224
 in children, unique considerations in, 218
 of spinal cord and optic nerve, of children, 221
 standard lexicon, for pediatric demyelination, 221–223
 standard protocol, for pediatric demyelination, 218–221
 standardized reporting, in pediatric multiple sclerosis, 223
 standardized acquisition and reporting, of pediatric multiple sclerosis, **217–226**
- Magnetization transfer imaging, in pediatric multiple sclerosis, 342–343
- Medial lemniscus, 214, 215
- Meyer loop, 203, 206
- Multiple sclerosis, and acquired pediatric demyelinating disease, diagnostic evaluation of, 322
 and neuromyelitis optica, features of, compared, 280
 pediatric, **227–243**
 2010 McDonald criteria for, 235
 advanced magnetic resonance imaging in, **337–354**
 basal ganglia lesion in, 226(5)
 brainstem lesion in, 226(6)
 cerebral lesion in, 226(7)
 cerebral white matter lesion in, 226(2)
 children at risk for, MR imaging predictors and, 235–238
 chronic cerebrospinal venous insufficiency in, 229
 cortical imaging in, 338–339
 cortical lesions in, detection of, 339
