TITLE

Endometriosis and ascites, a strategy to achieve pregnancy

ABSTRACT

Deep endometriosis presenting with ascites and preserved fertility is an unusual combination. This report describes a unique case of deep endometriosis and primary infertility, with successful pregnancy after optimal surgical approach and personalized ovarian stimulation protocol for IVF, showing the importance of a multidisciplinary approach in these patients.

Key Words: Ascites, Deep endometriosis, Rectovaginal septum nodule, Laparoscopic Surgery, Infertility, IVF

Institutional IRB is not required for the present manuscript, the patient authorizes the publication
