This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Robotic transperitoneal infrarenal

para-aortic lymphadenectomy with double docking: technique, learning curve and perioperative outcomes

Running Title: Double docking. Robotic lymphadenectomy.

Conflict of interest statement: All the authors did not disclose any financial support or potential conflict of interests.

Précis: to describe the feasibility and learning curve of robotic double docking transperitoneal infrarenal para-aortic lymphadenectomy combined with oncological pelvic surgery with 50 patients.
