

Index

Note: Page numbers of article titles are in **boldface** type.

A

- Acetaminophen, in osteoarthritis of knee, 2
- Anterior cruciate ligament, deficiency of, and lateral compartment unicompartmental knee arthroplasty, 15
 - reconstruction of, and unicompartmental knee arthroplasty, concomitant, 16, 46–47
 - unicompartmental knee arthroplasty in, selection criteria for, 47
- Anterior cruciate ligament-deficient knee, and unicompartmental arthritis, **43–55**
 - outcomes of, 51
 - postoperative management in, 51
 - preoperative planning for, 50
 - surgical procedure for, 50–51
 - treatment options in, 44–47
- unicompartmental knee arthroplasty in, 15
 - selection criteria for, 47
- Anterior cruciate ligament-deficient osteoarthritic copers, identification of, 47–50
- Arthritis, patellofemoral, unicompartmental knee arthroplasty in, 16
 - tricompartamental, 23
 - unicompartmental, and anterior cruciate ligament-deficient knee, **43–55**
 - outcomes of, 51
 - postoperative management in, 51
 - preoperative planning for, 50
 - surgical procedure for, 50–51
 - treatment options for, 44–47
 - arthroscopic debridement in, **23–41**
 - diagnosis of, and indications for treatment, **11–21**
 - nonoperative treatment of, **1–10**
 - of knee, future trends for, **161–174**
- Arthritis, Diet, and Activity Promotion Trial, 2
- Arthroplasty, in isolated medial noninflammatory osteoarthritis, 134, 135
 - of knee, completion of femoral preparation for, 74
 - completion of tibial preparation for, 75
 - extension gap and, 69, 70, 72
 - femoral resection in, linked distal, 70, 72
 - final component implantation, 75
 - final gap analysis in, 73
 - flexion gap and, 69, 71, 72
 - ideal, 67
 - technique of, 68–70
 - instrumentation for, 73
 - learning curve for, 70–72
 - linked distal femoral resection, 72
 - posterior femoral resection, 73

Arthroplasty (*continued*)

- tibial resection in, 68, 71
- trial of, 74
- of unicompartmental knee, 11–13, 45–46, 78, 113, 133
 - alignment rod for, 137
 - and anterior cruciate ligament reconstruction, concomitant, 16, 46–47
 - and patellofemoral arthroplasty, 16
 - complications of, 83–84, 144–146
 - contraindications to, 13
 - femoral cut guide for, 137–138
 - flexion-extension gap and, 138–140
 - future areas of research in, 146
 - in anterior cruciate ligament-deficient knee, 15
 - selection criteria for, 47
 - in obese, 14–15
 - in osteonecrosis, 17, 18
 - in patellofemoral arthritis, 16
 - in young, 13–14
 - indications for, 78, 134–135
 - and contraindications for, 135
 - and patient selection for, 13–18
 - lateral compartment, and anterior cruciate ligament deficiency, 15
 - minimally invasive, 123, 125
 - outcomes of, 81–83, 140–144
 - patient-specific instrumentation for, 136, 137
 - robotic-arm assisted, 123, 125
 - clinical outcomes of, 131
 - implant design for, 126
 - implant placement for, 128–130
 - tracker probe for, 127
 - virtual bone resection for, 127
 - robotic-assisted, **123–132**
 - selected studies of, 144
 - spacer block technique in, 78–80, 81, 82
 - surgical technique for, 78–81, 135–140
 - trials inserted in, 140
 - true extramedullary techniques in, 81
- of unicondylar knee, **87–104**
 - advantages of, 152
 - bone cuts for, distal femoral, 93–94
 - posterior femoral and chamber cuts, 96, 97
 - proximal tibial, 94–95
 - complications and outcomes of, 99
 - durability and survivorship of design of, 150
 - failure of, modes of, 156–157
 - fat pad and osteophyte excision in, 92–93
 - implants for, cementing of, 99, 100
 - final preparation for, 98
 - trialing of, and balancing gaps, 96–97, 98
 - lateral, 152–153
 - mobile-bearing, 151
