

Instructions to Authors

These instructions for authors, along with information about copyright, can also be found on the Internet: access under <http://www.elsevier.com/locate/gaitpost>

Authors should submit papers online via <http://ees.elsevier.com/gaipos>. This is the Elsevier web-based submission and review system. You will find full instructions located on this site in the Tutorial for Authors. Please follow the guidelines to prepare and upload your article. Once the uploading is done, the system automatically creates an electronic pdf which is used for reviewing. All correspondence, including notification of the Editor's decision and requests for revisions, will be managed via this system.

Preparation of the Manuscript

- Article types accepted are: Original Article (Full Paper or Short Communication), Review Article, Technical Note, Book Review. Word limits including the abstract are as follows: Full paper 3,000 words plus no more than 5 figures/tables in total; Short Paper or Technical Note 1,200 words plus no more than 3 figures/tables in total. If the Editor feels that a paper submitted as a Full Paper would be more appropriate for the Short Communications Section, then a shortened version will be requested. References should be limited to 30 for Full Papers, 15 for Short Papers and 10 for Technical Notes. An abstract not exceeding one paragraph of 250 words should appear at the beginning of each Article. The recommended word limit for Review Papers is 6,000 words. Authors must state the number of words when submitting.
- All publications will be in English. Authors whose 'first' language is not English should arrange for their manuscripts to be written in idiomatic English **before** submission. A concise style avoiding jargon is preferred.
- Authors should supply up to five keywords that may be modified by the Editors.
- Acknowledgements should be included after the end of the Discussion and just before the References. Include external sources of support.
- The text should be ready for setting in type and should be **carefully checked** for errors. Scripts should be typed double-spaced on one side of the paper only. Please do not underline anything, leave wide margins and number every sheet.
- All illustrations should accompany the typescript, **but not**

be inserted in the text. Refer to photographs, charts, and diagrams as 'figures' and number consecutively in order of appearance in the text. Substantive captions for each figure explaining the major point or points should be typed on a separate sheet.

- Tables should be presented on separate sheets of paper and labelled consecutively but the captions should accompany the table.

Summary of Overall Arrangement of Manuscripts

You should arrange your contribution in the following order:

- A cover page with complete details of the title, the source, and the authors full contact details.
- An abstract outlining the purpose, scope and conclusions of the paper.
- The text suitably divided under headings. (frequently Introduction, Material or Patients, Methods, Results, Discussion will prove satisfactory)
- Acknowledgements (if any).
- References.
- Tables with captions (each on a separate sheet).
- Captions to illustrations (grouped on a separate sheet or sheets).
- Illustrations, each on a separate sheet containing no text.
- Supplementary data.

Illustrations

Authors are required to provide electronic versions of their illustrations. Information relating to the preferred formats for artwork may be found at <http://authors.elsevier.com> and also on the online submission homepage <http://ees.elsevier.com/gaipos>.

Photographs:

Colour reproduction is available if the author is willing to bear the additional printing costs. Patients must not be identifiable from a photograph. If it is essential for a patient's face to be shown, written permission must be obtained from the patient and submitted with the manuscript.

References

Indicate references to the literature in the text by superior Arabic numerals that run consecutively through the paper in order of their appearance. Where you cite a reference more than once in the text, use the same number each time.

References should take the following form:

1. Amis AA, Dawkins GPC. Functional anatomy of the anterior cruciate ligament. *J Bone Joint Surg [Br]* 1991; 73B:260–267.
2. Insall JN. *Surgery of the Knee*. New York: Churchill Livingstone; 1984.
3. Shumway-Cook A, Woollacott M. *Motor Control: Theory and Practical Applications*. Baltimore: Williams and Wilkins; 1995.

Please ensure that references are complete, i.e. that they include, where relevant, author's name, article or book title, volume and issue number, publisher, year and page reference and comply with the reference style of *Gait & Posture*. Only salient and significant references should be included.

What Information to Include with the Manuscript

1. Having read the criteria for submissions, authors should specify in their letter of transmittal whether they are submitting their work as an Original Article (Full Paper or Short Communication), Review Article, Technical Note, or Book Review. Emphasis will be placed upon originality of concept and execution. Only papers not previously published will be accepted. Comments regarding articles published in the Journal are solicited and should be sent as "Letter to the Editor". Such Letters are subject to editorial review. They should be brief and succinct. When a published article is subjected to comment or criticism, the authors of that article will be invited to write a letter or reply.
2. A letter of transmittal must include the statement, "Each of the authors has read and concurs with the content in the final manuscript. The material within has not been and will not be submitted for publication elsewhere except as an abstract." The letter of transmittal must be from all co-authors. All authors should have made substantial contributions to all of the following: (1) the conception and design of the study, or acquisition of data, or analysis and interpretation of data, (2) drafting the article or revising it critically for important intellectual content, (3) final approval of the version to be submitted.
3. Acknowledgement of other contributors. All contributors who do not meet the criteria for authorship as defined above should be listed in an acknowledgements section. Examples of those who might be acknowledged include a person who provided purely technical help, writing assistance, or a department chair who provided only general support. Authors should disclose whether they had any writing assistance and identify the entity that paid for this assistance.
4. Work on human beings that is submitted to *Gait & Posture* should comply with the principles laid down in the Declaration of Helsinki; Recommendations guiding physicians in biomedical research involving human subjects. Adopted by the 18th World Medical Assembly, Helsinki, Finland, June 1964, amended by the 29th World Medical Assembly, Tokyo, Japan, October 1975, the 35th World Medical Assembly, Venice, Italy, October 1983, and the 41st World Medical Assembly, Hong Kong, September 1989. The manuscript should contain a statement that the work has been approved by the appropriate ethical committees related to the institution(s) in which it was performed and that subjects gave informed consent to the

work. Studies involving experiments with animals must state that their care was in accordance with institution guidelines. Patients' and volunteers' names, initials, and hospital numbers should not be used.

5. At the end of the text, under a subheading "Conflict of interest statement" all authors must disclose any financial and personal relationships with other people or organisations that could inappropriately influence (bias) their work. Examples of potential conflicts of interest include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications/registrations, and grants or other funding.
6. All sources of funding should be declared as an acknowledgement at the end of the text. Authors should declare the role of study sponsors, if any, in the study design, in the collection, analysis and interpretation of data; in the writing of the manuscript; and in the decision to submit the manuscript for publication. If the study sponsors had no such involvement, the authors should so state.
7. Authors are encouraged to suggest referees although the choice is left to the Editors. If you do, please supply their postal address and email address, if known to you.
8. Please note that papers are subject to double-blind review. Therefore any information that reveals where and by whom the study was undertaken must be removed from the manuscript.

Randomised Controlled Trials

All randomised controlled trials submitted for publication in *Gait & Posture* should include a completed Consolidated Standards of Reporting Trials (CONSORT) flow chart. Please refer to the CONSORT statement website at <http://www.consort-statement.org> for more information. The Journal has adopted the proposal from the International Committee of Medical Journal Editors (ICMJE) which require, as a condition of consideration for publication of clinical trials, registration in a public trials registry. Trials must register at or before the onset of patient enrolment. The clinical trial registration number should be included at the end of the abstract of the article. For this purpose, a clinical trial is defined as any research project that prospectively assigns human subjects to intervention or comparison groups to study the cause-and-effect relationship between a medical intervention and a health outcome. Studies designed for other purposes, such as to study pharmacokinetics or major toxicity (e.g. phase I trials) would be exempt. Further information can be found at www.icmje.org.

Technical Notes

1. Technical Notes should be 1,200 words in length at most.
2. There should be no more than 3 figures/tables in total, and no more than 10 key references.
3. A technical note should explain or report on the development of a technical device or method that is specifically new or novel but is not a commercial product development.
4. Format of the Technical Note: 1. Introduction, 2. Technique description, 3. Discussion focusing on the role of the technique, especially advantages and liabilities related to other options.
5. On acceptance of the Technical Note, authors will be requested to disclose any possible conflicts of interest.
