

Index

Note: Page numbers of article titles are in **boldface** type.

A

- Acetabular cartilage, MR imaging assessment of, 114–116
- Acetabular labrum, MR imaging assessment of, 114
- Advanced Multimodality Image Guided Operative (AMIGO) suite, 6–7, 8
- AIDS, musculoskeletal lymphoma and, 84–85
- AIDS dementia complex, 129
- Alzheimer's disease, amyloid imaging in, 125
 - diffusion-weighted imaging diffusion-tensor imaging in, 121–123
 - functional MRI in, 124–125
 - magnetic resonance spectroscopy in, 123–124
 - magnetization transfer ratio in, 123
 - structural MRI in, 121–123
- Amyloid imaging, in Alzheimer's disease, 125
- Angiography, MR, contrast-enhanced, in Takayasu arteritis, 52–53
 - of aorta, 45–46
 - of aortic aneurysm, 46, 47
 - of aortic dissection, 49, 50
- Aorta, contrast-enhanced MR angiography of, 45–46
 - MR imaging of, **43–55**
 - basic technical considerations in, 43–46
 - black-blood vascular, 44
 - bright-blood vascular, 44–45
 - compared to CT imaging, 43
- Aortic aneurysm, contrast-enhanced MR angiography of, 46, 47
 - infected, MR imaging of, 46, 48
 - inflammatory, MR imaging of, 46, 47, 48
 - spin echo MR imaging of, 46, 47, 48
- Aortic disease, MR imaging in, 46–53
- Aortic dissection, contrast-enhanced MR angiography of, 49, 50
 - MR imaging of, 47–49, 50
- Arterial curve, analysis of, gadolinium systemic model and, 35–36
- Arthrography, MR, in osteoarthritis, 105–106
- Atherosclerotic ulcer, penetrating, 51, 52

B

- Blood flow, renal, single-kidney, calculation of, 35
- Bone, chemotherapy and radiation of, complications of, 89, 90, 91
 - lymphoma of. See *Lymphoma, of bone.*
- Bone marrow, evaluation of, with FDG-positron emission tomography, 88–91
- Bone scintigraphy, in lymphoma of bone, 77, 79

Brachytherapy, future of, 19

- MR imaging-guided, for prostate cancer, 16–19
 - outcomes of, 19
 - patient selection for, 17
 - procedure for, 17–19

“Brain shift,” 1, 2

Breast, contralateral, breast MR imaging in staging examination of, 65

Breast cancer, neoadjuvant chemotherapy response in, 66–67

- occult primary, 68
- patients at high risk for, screening of, 68
- residual disease in, assessment in, 67
- tumor recurrence in, at lumpectomy site, 67–68

Breast conservation therapy, breast MR imaging and, contraindications to, 63

Breast MR imaging, and breast conservation therapy, contraindications to, 63

background of, 62

diagnostic, current status and future directions in, **57–74**

- recent guidelines and recommendations for, 57–59
- for preoperative staging in, 62–66
- hormonal-related enhancement of, 69–71
- image acquisition for, 71
- in cancer staging, controversies in use of, 64–65
 - issues to consider in, 65
- in inconclusive mammography, 68–69
- in recurrence of breast disease, 63
- new developments in technology of, 72
- of contralateral breast, in staging examination, 65
- of positive surgical margins, 64
- overuse/over-reliance on, pitfalls of, 69
- preoperative, identification of patients for, 65–88
- sensitivity and specificity issues in, 59–62

C

- Cartilage matrix, quantitative imaging of, in osteoarthritis, 106–107
- Central nervous system, dementing disorders of, 129
- Chemotherapy, and radiation of, causing complications of bone, 89, 90, 91
- Cognitive disturbances, MRI in, 128–129
- Correlative fusion imaging, clinical role of, 137–140, 141, 142, 143, 144
- Cryotherapy, for uterine fibroids, 14–15
 - percutaneous, MR imaging-guided, of renal tumors, 21–22, 23

CT, and MR imaging of aorta, compared, 43
 in lymphoma of bone, 77–78, 79, 80
 in lymphoma of muscles, 81–82, 85
 Cutaneous and subcutaneous tissue, lymphoma of,
 83–84, 86

D

Dementia, frontotemporal, MRI in, 128
 MRI in, **121–132**
 vascular, MRI in, 125–127
 NINDS-AIREN criteria, 125–126, 127

F

FDG-Positron emission tomography, and MR
 imaging, monitoring treatment response of
 lymphoma with, 85–86, 87
 bone marrow evaluation using, 88–91
 Femoroacetabular impingement, as trigger of hip
 osteoarthritis, 111–112, 113
 diagnosis of, 112–113
 measurements in, 113–114, 115, 116
 Frontotemporal dementia, MRI in, 128
 Fusion imaging, clinical role of, using PET, CT, and
 MR imaging, **133–149**
 correlative, clinical role of, 137–140, 141, 142,
 143, 144
 future prospects for, 145

G

Gadolinium-enhanced renal perfusion-distribution
 imaging, 33
 Gadolinium-enhanced MR imaging, of cartilage, 107
 Gadolinium kidney model, analysis of kidney curve
 and, 36–37
 Gadolinium systemic model, analysis of arterial curve
 and, 35–36
 Genital tract, female, 11
 male, 15
 Genitourinary tract, MR imaging-guided interventions
 in, **11–28**
 Glomerular filtration rate, single-kidney, calculation
 of, 35–37

H

Hardware-based multimodality imaging, 134–137
 Hematoma, intramural, spin echo MR imaging of,
 49–52
 Hip, articular cartilage of, biochemical imaging of,
 116–118
 osteoarthritis of, MRI in, and implications for
 surgery, **111–120**
 risk factors for, 111
 Huntington's disease, MRI in, 128

I

Image registration, software-based, and fusion, 134
 IMRIS iMRI, 5, 6

K

Kidney, MR imaging-guided radiofrequency ablation
 in, 21
 normal, 29, 30
 transplanted, diagnostic imaging of, 38, 40
 Kidney curve, analysis of, gadolinium kidney model
 and, 36–37

L

Lymphoma, musculoskeletal, and AIDS, 84–85
 of bone, bone scintigraphy in, 77, 78
 clinical features of, 76
 CT in, 77–78, 79, 80
 imaging of, 76
 incidence of, 75
 MR imaging in, 78–80, 82, 83
 radiography of, 76–77, 78, 79
 of cutaneous and subcutaneous tissue, 83–84, 86
 of muscles, CT in, 81–82, 85
 differential diagnosis of, 82–83
 imaging of, 81
 incidence of, 80–81
 MR imaging of, 81, 84
 ultrasound in, 82, 85
 of musculoskeletal system, imaging of, **75–93**
 imaging modalities in, 75
 treatment of, response to, and treatment-related
 changes, 85–91

M

Magnetic resonance-guided focused ultrasound
 surgery, clinical trials in, 12–14
 equipment for fibroid treatment, 12
 for treating uterine fibroids, 11–14
 fundamentals, 12
 patient selection for, 12
 treatment planning for, 12
 Magnetic resonance nephrourography, **29–42**
 image analysis in, 33–35
 in congenital anomalies and obstruction,
 37–38, 39
 limitatitons of, 38–41
 renal function and, 3–33, 341
 structure of kidneys and, 29–31
 Magnetic resonance spectroscopy, in Alzheimer's
 disease, 123–124
 Magnetic Resonance Therapy (MRT) unit, 1–2, 3
 MR angiography, contrast-enhanced, in Takayasu
 arteritis, 52–53
