

# Journal of Vascular Surgery® Cases

Anton N. Sidawy, Editor-in-Chief, Bruce A. Perler, Senior Editor

## INFORMATION FOR AUTHORS

### SCOPE OF THE JOURNAL

*Journal of Vascular Surgery Cases* is a surgical journal dedicated to publishing peer-reviewed high-quality case reports related to all aspects of arterial, venous, and lymphatic diseases, including the placement and maintenance of arteriovenous dialysis accesses with an emphasis on the practicing clinician. The *Journal* seeks to provide novel and timely information to vascular surgeons, interventionalists, phlebologists, wound care specialists, and allied health professionals involved in the management of patients with the entire spectrum vascular disease.

### EDITORIAL POLICIES

The editorial policies of the *Journal* are published in the March issue, on the Web site ([www.jvascsurgcases.org](http://www.jvascsurgcases.org)), on the *Editorial Manager* Web site (<http://jvs.editorialmanager.com>), and are available from the Editorial Office on request.

### ADMINISTRATIVE POLICIES

Authors will be notified of an accept decision and at the same time requested to pay an Author Processing Fee of US \$500 (exclusive of VAT/Sales Tax). Following payment of this fee, case reports will be made universally available at no further charge through ScienceDirect, <http://www.sciencedirect.com>, and through the *Journal's* own Web site [www.jvascsurgcases.org](http://www.jvascsurgcases.org).

**Editors' and Publisher's waiver of responsibility.** Statements and opinions expressed in articles and communications herein are those of the author(s) and not necessarily those of the Editors and Publisher. The Editors and Publisher disclaim any responsibility or liability for such material. Neither the Editors nor the Publisher guarantee, warrant, or endorse any product or service advertised in the *Journal*, and they do not warrant any claim made by the manufacturer of such product or service.

### SUBMISSION OF ORIGINAL MANUSCRIPT

The *Journal's* requirements for submission of a manuscript are in accordance with "Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals" of the International Committee of Medical Journal Editors (ICMJE) and available at <http://www.icmje.org/icmje-recommendations.pdf>. The *Journal's* instructions for authors are summarized below.

### Submission of manuscripts

Manuscripts should be submitted to the *Journal of Vascular Surgery Cases* electronically, using the Web-based system *Editorial Manager*. To submit a manuscript, authors should login to the Web site <http://jvs.editorialmanager.com/>, where detailed instructions can be found. Manuscripts, including figures and tables, are submitted via this Web site in multiple files. To use this system authors must have an Internet connection, an e-mail program, a Web browser, Microsoft Word, and Adobe Acrobat Reader (which can be downloaded at no charge at the above Web site).

**Formatting instructions.** Manuscripts must be created using Microsoft Word and uploaded in *Editorial Manager*.

- Double-space all sections (ie, abstract, text, acknowledgments, references, figure legends, and tables).
- Use at least 1-inch margins on all sides.
- Use 12-point Times New Roman font.
- Number the pages consecutively in the upper right corner.

**Basic information for electronic submission.** To upload a manuscript using *Editorial Manager*, authors must provide the following information:

- A concise, informative, declarative title of the manuscript;
- The preferred name(s), initials, and surname of the author(s) and their highest earned academic degrees, listed in the order that these should appear if the manuscript is published;
- Departmental and institutional affiliations of each author;
- A completed Author Role, Originality, and Conflict of Interest form, including all financial or material support provided to the authors;
- The meeting, session (ie, plenary session, poster presentation, etc), date, and place where the paper was presented, if applicable;
- The name and address of the person to whom correspondence is to be addressed.

**Forms to be transmitted with submitted manuscripts.** All manuscripts must be accompanied by a completed Author Role, Originality, and Conflict of Interest form. This information will be provided to reviewers and Editors for their evaluation of appropriate involvement. A conflict of interest statement will be published with each manuscript based on the information provided on this form. Authors are referred to a detailed publication on this topic (Johnston KW, Rutherford RB. Disclosure of conflict of interest.

J Vasc Surg 1999;30:200-2). If an author fails to disclose his/her conflicts, the actions open to the Editors are described in Johnston KW, Rutherford RB. Failure to disclose competitive interests. J Vasc Surg 2000;31:1306. The *Journal* is a member of the Committee on Publication Ethics (COPE) and will follow its guidelines. More information about COPE may be found at <http://publicationethics.org/>.

Finally, all revised manuscripts must be accompanied by a Review Response form. These forms are available for download from the *Editorial Manager* Welcome page (<http://jvs.editorialmanager.com>).

**Material to be submitted after manuscript acceptance.** After a manuscript is accepted, the Publisher will contact the corresponding author for proof corrections and to collect the publication fee.

For further assistance and clarification, please contact:

**Consent to reproduce data.** It is the authors' responsibility to obtain written consent from the copyright owner to reproduce direct quotations, tables, or illustrations that have appeared in copyrighted material and to provide complete information regarding their source. Similarly, permission must be obtained for tables and figures that have been modified from other publications. Such permissions must be obtained prior to manuscript submission and be provided to the Publisher when the Copyright Transfer form is collected. You can obtain permission to reproduce most content from the Copyright Clearance Center at [www.copyright.com](http://www.copyright.com).

**Patient consent.** Patients must consent to the publication of their data in all case reports. Photographs of identifiable persons must be accompanied by signed releases from patients or from both living parents or guardians of minors. As per AMA Style, inserting black bars over the patient's eyes is insufficient and may not be used. Similarly, consent must be obtained if a person can be identified from the case description.

#### **Description of manuscript components**

**Title.** Titles must be concise and accurately reflect the content of the manuscript. *Furthermore, titles must be declarative, stating the topic and results when possible, rather than posing a question.* This is important for assisting clinicians and researchers find the article in Medline once it has been published.

- DO NOT format the title as a question;
- DO NOT include a colon in the title or make it two parts using any other punctuation;
- DO NOT restate the article type (ie, case report, case study);
- DO NOT include your Institution Name in the title.

**Authors.** By submitting this manuscript, each author certifies that they have made a direct and

substantial contribution to the work reported in the manuscript by participating *in each of* the following three areas: (1) conceiving and designing the study; or collecting the data; or analyzing and interpreting the data; (2) writing the manuscript or providing critical revisions that are important for the intellectual content; and (3) approving the final version of the manuscript. They have participated to a sufficient degree to take public responsibility for the work and believe that the manuscript describes truthful facts. They declare that they shall produce the data on which the manuscript is based for examination by the Editors or their assignees, should it be requested. Each author also agrees to allow the corresponding author to make decisions regarding submission of the manuscript to the *Journal*, changes to galley proofs, and prepublication release of information in the manuscript to the media, federal agencies, or both.

No more than six authors will be permitted for a case report. The Editors suggest that some contributors might better be acknowledged than listed as authors.

For more information on the requirements for authorship, see the "Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals" (<http://www.icmje.org/icmje-recommendations.pdf>), section II.A on Authorship and Contributorship. For further information, please see "Criteria for Authorship" J Vasc Surg 2005;42:599.

**Abstract and Title Page.** The title page must include the title of the manuscript, the names of the authors, affiliations, and contact information for the corresponding author. The abstract should clearly state, in approximately 100 words the main factual points of the article.

Tables, figures, reference citations, and trademarked names should not appear in the abstract.

**Manuscript body.** Manuscripts must conform to standard English usage and are subject to editing in conformance with the policies of the *Journal*. For reference, authors may consult the American Medical Association's *Manual of Style, 10th Edition*. Generic drug names should be used, specifically the United States Adopted Name (USAN). Proprietary drug names may be cited in parentheses. Generic equipment names should be used whenever possible and the proprietary name of the equipment cited in parentheses; after the proprietary name, cite the manufacturer and the city, state, and country of manufacture.

Measurements (height, weight, etc.) should be stated in metric units. Hematologic and clinical chemistry measurements can be stated in System International (SI) units or non-SI units. Note that SI units are recommended in the "Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals" (<http://www.icmje.org/icmje-recommendations.pdf>).
