This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 Weather Affects Grasshopper Population Dynamics in Continental Grassland

Over Annual and Decadal Periods

Jayne L. Jonas¹, William Wolesensky², Anthony Joern³

Authors are ¹Research Associate III, Department of Forest and Rangeland Stewardship, Colorado State University, Fort Collins, CO 80523, USA; ²Lecturer, Department of Mathematics, University of Texas, Austin, TX 78712 USA; and ³Professor, Division of Biology, Kansas State University, Manhattan, KS 66506, USA

Research over this 25-year period was supported in part by NSF/DEB and DOE/NIGEC. Analyses were supported by funds to AJ from NSF EPS 0553722 (Ecological Forecasting), DEB0456522, and the NSF Konza LTER Program.

At the time of research, Jonas was a graduate research assistant, Division of Biology, Kansas State University, Manhattan, KS 66506, USA.

Correspondence: Anthony Joern, Division of Biology, Kansas State University, Manhattan, KS 66505, USA. Phone: 785-532-7073, Email: ajoern@ksu.edu
