

Product roundup

3M United Kingdom

Laptop and desktop computer privacy filters from 3M restrict the viewing angle so that only persons directly in front can see on-screen data while anyone positioned to the side will see only a blacked-out screen. Now available from stationery and office suppliers or on-line computer accessory resellers.

Acunetix

Acunetix Web Vulnerability Scanner automatically checks for SQL injection, XSS & other vulnerabilities on shopping carts, forms, dynamic content & other web applications. It checks password strength on authentication pages and creates professional security audit reports.

Version 4 out in June 2006 will include command line support, javascript + AJAX support

- **Price: Starts from €1275 for a perpetual license to scan 1 website - up to €4100 for a perpetual license to scan an unlimited amount of websites**
- **Main target markets: Security Resellers, Banks, Government organizations. All range of company size from SMBs to Fortune 1000**

Akonix

In April 2006, Akonix announced the general availability of two brand-new appliances for IM security, compliance, and management, the A6000™ for enterprise class IM control, and the A1000 for businesses from 50 to 1000 employees. Both appliances are 1U rack-mount servers, manufactured by Dell, running AkOS as the operating system, and factory-configured with Akonix L7 Enterprise, L7 Enforcer, Sophos Anti-Virus, and an onboard PostgreSQL database. Both appliances have customized rack-mount hardware.

- **Target markets: A6000 - Enterprises
A1000 - smaller companies with 50 to 1000 employees**

AEP Networks

AEP Networks' NSP version 5.2.2 SSL VPN enables secure, web-browser access to a broad range of enterprise applications. NSP includes multiple access modes, device identification, and seamless support for both Citrix and Windows Terminal Services-based environments.

- **List price starts at €3000.**

AirDefense

AirDefense Architect provides complete design and 3D RF simulation of wireless LANs based on building-specific environments.

AirDefense Architect minimizes design and deployment costs by helping the designer visualize the physical location and configuration of installed network equipment, automatically placing and configuring access points, and accurately predicting network coverage and capacity.

- **Price: €16,600 Euros**

AirDefense Survey provides real-time, in-the-field measurements of Wi-Fi RF environments for site-specific surveys. AirDefense Survey performs data networking measurements such as latency, throughput, and delay. With AirDefense Survey, designers can rapidly verify the performance of the WLAN network, and archive or exchange the measurements quickly with other AirDefense Architect users.

- **Price: €1,450**

AirDefense Mobile gives enterprises an AirDefense-powered mobile product to perform a real-time snapshot of all WLAN infrastructure and activity (802.11 a/b/g). This tool provides wireless device inventory, threat index analysis, location tracking, advanced rogue management and automated protection.

- **Price: €1,875**

AirTight Networks

In support of the AirTight Wireless Intrusion Prevention and Management (WIPM) architecture and in conjunction with the SpectraGuard Managed Network Console (MNC), SGE 5.0 adds capabilities for multiple tiered levels of management, as well as scalability and performance enhancements. SGE 5.0 adds the ability to manage tens of thousands of SpectraGuard SAFE clients from a single server/appliance. SGE 5.0 will ship to all new customers and be available as an upgrade to the AirTight installed base in June.

Appgate

AppGate's NAC mobile VPN client for Windows Mobile 5 delivers application-centric security and functionality for access to Microsoft programmes, and download and Email capability for PDAs and smart phones. It is said to work from any device and on any type of connection, and is said to give secure access to business data, with security features controlling access and protecting critical business systems.

Argosy TelCrest

Argosy TelCrest have released version 1.57 of the Enterprise Password Safe which provides a centralised, audited, password store accessible via a web browser. Version 1.57 adds the ability to require multiple users to approve access to a password, customisable fields, and many more new features.

- **Price: €187.50 for 5 users, €30 per additional user**
- **Target Market: IT departments**

Baronscourt Technology

MetaCompliance Policy Communicator (MPC) has been designed to help companies achieve the ISO 27001 framework. MPC communicates policies to staff electronically to ensure understanding and acceptance, creates an audit trail of key policy acceptance to reduce the risk of compliance, and demonstrates evidence of duty of care.

- **Main Target Markets: IT Departments, HR Departments and Compliance Company Secretaries**

BeCrypt

BeCrypt Connect Protect 2.0 Port Controller

Connect Protect 2.0, provides centrally-managed fine-grained removable device control. Policies can control the use of devices, such as memory sticks, either by preventing connection, or monitoring data and events.

Connect Protect 2.0 has been awarded the CCT Mark.

- **Price: €24 per licence**
- **The target market is enterprises within the corporate, government and defence sectors**

Beta Systems

Beta Systems has launched SAM eSSO (enterprise Single Sign On) which provides access to all applications with a single authentication step.

- **Pricing starts from approx €35 per seat, dependent upon volume.**
- **Target market: enterprises with between 1,000 and 100,000 users**

Billion Electric Company

BiGuard S10 SSL VPN Security Gateway

The BiGuard S10 is an all-in-one security gateway integrated with SSL VPN, Firewall and Router functions. It supports 10 SSL VPN concurrent connections for authorized users to secure remote access to the corporate network through a Web browser. The unit also features Personalized Web Portal for easy configuration.

- **Price: €500**
- **Main target market: SOHO and SMB segments**

CipherOptics

Rapid industry adoption of broadband wireless, metropolitan area networks, and Ethernet private line and transparent LAN services necessitates encrypting the entire Ethernet payload to properly secure data. The CipherOptics ESG1002/ESG100 addresses this market need by offering full-duplex encryption with low overhead and, the company says, virtually no latency, enabling customers to protect data in motion with no impact on current network operations.

Citicus

Citicus's web-based information risk and compliance management software will be available in multiple languages from 16 June. The languages initially supported will be Dutch, English (UK), English (US), French, German and Japanese. 'Owners' of information systems can thus complete risk and compliance evaluations and view results in their local language.

- **Pricing: Citicus ONE is available from €15k for an in-house installation or from €8k euros per annum for a hosted service.**
- **Main Target Market: any organization with a high reliance on IT systems that needs to understand their risk status and/or assess compliance with regulatory requirements**

Code Green

Code Green Networks has released version 2.1 of its enterprise content management and digital finger printing technology, allowing companies to identify and protect data - in all formats and languages against unauthorized disclosure across all leakage points. This answers many of the compliance and regulations requirements being placed on major corporations.

- **Price: Approx €70k**
- **Target Market: Finance, Pharmaceutical, Government**

Configuresoft

Configuresoft's Enterprise Configuration Manager (ECM) 4.8 offers enterprise-wide compliance transparency through executive dashboard views with drill-down ability. The release also includes extended platform coverage, cross-platform regulatory toolkits and web-based compliance management.

Crossbeam

Crossbeam adds two new products to its C-series line of UTM security services switches. The C12 and C25 add to the series the ability to offer multi-function security from best-in-class vendors to enterprises with 100 to 1000 users. The C12 and C25 run any combination of firewall, VPN, intrusion prevention and anti-virus. Priced from \$12,000 (C12) and \$25,000 (C25).
