Journal of Mathematical Analysis and Applications

ASSOCIATE EDITORS

DAVID M. AMBROSE
Drexel University
Partial differential equations and fluid dynamics

VLADIMIR ANDRIEVSKII
*Kent State University**
Approximation theory
Potential theory

JOSEPH A. BALL
*Virginia Polytech Institute**
Operator and control theory

JESUS BASTERO
*Universidad de Zaragoza**
Asymptotic geometric analysis
Geometry of Banach spaces
Function spaces

HEINZ H. BAUSCHKE
University of British Columbia, Okanagan
Functional analysis
Operator theory
Mathematical programming

TOMÁS DOMÍNGUEZ BENAVIDES
Facultad de Matematicas
Universidad de Sevilla
Nonlinear functional analysis

BRUCE C. BERNDT
*University of Illinois**
Analytic number theory
Classical analysis
Special functions

DAVID BLECHER
*University of Houston**
Functional analysis
Operator theory
Operator algebras

GEORGE BLUMAN
*University of British Columbia**
Differential equations

JOSÉ BONET
Universidad Politecnica de Valencia
Functional analysis
Operator theory

BENEDETTO BONGIORNO
Dipartimento di Matematica ed Appl.
University of Palermo
Real analysis

MARIA CARRO
Universidad de Barcelona
Real analysis
Harmonic analysis

BERNARDO CASCALES
Universidad de Murcia
Measure and integration
Functional analysis

ANDREA CIANCHI
Università degli Studi di Firenze
Function spaces
Partial differential equations

PATRICK L. COMBETTES
Université Pierre et Marie Curie
Convex optimization
Inverse problems
Nonlinear functional analysis

GUSTAVO CORACH
*Instituto Argentino de Matematica**
Functional analysis
Operator theory
Harmonic analysis

ARIS DANIILIDIS
Universitat Autonoma de Barcelona
Variational analysis
Optimization

MANUEL DEL PINO
Universidad de Chile
Concentration phenomena in nonlinear elliptic equations
Blow-up and asymptotic behavior in nonlinear parabolic equations

ASEN DONTCHEV
Division of Mathematical Sciences
National Science Foundation
Variational analysis
Optimization
Control

KATHY DRIVER
University of Cape Town
Special functions including trigonometric functions
Approximations and expansions

RICARDO G. DURÁN
University of Buenos Aires
Finite element methods
Harmonic analysis

LAWRENCE FIALKOW
State University of New York
Functions of a complex variables
Integral transforms, operational calculus
Operator theory

JERZY A. FILAR
School of Mathematics
University of South Australia
Optimization
Operations research
Markov decision processes
Game theory
Singular perturbations
Application

STEPHEN A. FULLING
Texas A&M University
Theoretical physics
Spectral and asymptotic theory of differential operators

RUTH GORNET
*University of Texas at Arlington**
Spectral geometry

JEAN LUC GUERMOND
Texas A&M University
Fluid mechanics
Partial differential equations
Numerical analysis

**Department of Mathematics*

Journal of Mathematical Analysis and Applications

ASSOCIATE EDITORS

CRISTIAN GUTIERREZ
*Temple University**
Partial differential equations
Harmonic analysis

YU HUANG
*Zhongshan University**
Dynamical systems
Chaos
Control theory

ALEXANDER V. ISAEV
Centre for Mathematics and Its Applications
The Australian National University
Complex analysis and geometry

KRZYSZTOF JAROSZ
*Southern Illinois University, Edwardsville**
Functional analysis
Spaces of analytic functions of a single variable

BARBARA KALTENBACHER
Alpen-Adria-Universität Klagenfurt
Partial Differential Equations
Calculus of Variations and Optimal Control;
Optimization
Numerical Analysis

HYEONBAE KANG
Inha University
Inverse problems
Partial differential equations

DMITRY KHAVINSON
*University of South Florida**
Classical analysis

PEKKA KOSKELA
Department of Mathematics and Statistics
University of Jyväskylä
Quasiconformal mappings
Sobolev spaces
Analysis on metric spaces

MIKLÓS LACZKOVICH
Department of Analysis
Eötvös Loránd University
Real functions
Measure theory

WILLIAM LAYTON
*University of Pittsburgh**
Differential equations
Fluid mechanics
Turbulence

PIERRE GILLES LEMARIE-RIEUSSET
Universite d'Evry
Harmonic analysis
Nonlinear PDEs
Wavelets

HAILIANG LIU
Iowa State University
Hyperbolic partial differential equations
Numerical analysis

YUAN LOU
Ohio State University
Partial differential equations
Mathematical biology

ALESSANDRA LUNARDI
*Università degli Studi di Parma**
Eliptic and parabolic partial differential equations
Abstract evolution equations

MARTIN MATHIEU
Queen's University Belfast
Functional analysis
Operator theory

JEAN MAWHIN
*Université de Louvain, Louvain-la-Neuve**
Nonlinear differential equations
Nonlinear functional analysis
Critical point theory

P.J. McKENNA
University of Connecticut
Nonlinear boundary value problems

JEFF MORGAN
University of Houston
Reaction diffusion systems

PAUL NEVAI
King Abdulaziz University
Approximation theory
Orthogonal polynomials

KENJI NISHIHARA
Waseda University
Partial differential equations
Asymptotic analysis

DONAL O'REGAN
*National University of Ireland, Galway**
Nonlinear analysis

HAROLD R. PARKS
*Oregon State University**
Geometric analysis
Calculus of variations

MAGDA PELIGRAD
*University of Cincinnati**
Probability theory
Inequalities and limit theory for stochastic processes

MARCO PELOSO
Università degli Studi di Milano
Harmonic analysis
Several complex variables

ROMAN POPOVYCH
*University of Vienna**
Ordinary differential equations
Partial differential equations

**Department of Mathematics*
