Fibrin structural and diffusional analysis suggests that fibers are permeable to solute transport

Kimon Alexandros Leonidakis, Pinaki Bhattacharya, Jennifer Patterson, Bart E. Vos, Gijsje H. Koenderink, Jan Vermant, Dennis Lambrechts, Maarten Roeffaers, Hans Van Oosterwyck

PII: S1742-7061(16)30517-7
DOI: <http://dx.doi.org/10.1016/j.actbio.2016.09.044>
Reference: ACTBIO 4465

To appear in: *Acta Biomaterialia*

Received Date: 23 June 2016
Revised Date: 1 September 2016
Accepted Date: 29 September 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Fibrin structural and diffusional analysis suggests that fibers are permeable to solute transport
