

Accepted Manuscript

Title: Combination of Physico-Chemical Entrapment and Crosslinking of Low Activity Laccase-Based Biocathode on Carboxylated Carbon Nanotube for Increasing Biofuel Cell Performance

Author: Marcelinus Christwardana

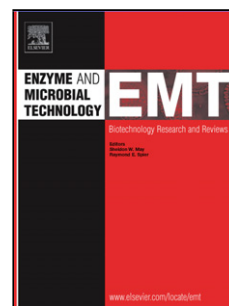

PII: S0141-0229(17)30122-9
DOI: <http://dx.doi.org/doi:10.1016/j.enzmictec.2017.06.012>
Reference: EMT 9096

To appear in: *Enzyme and Microbial Technology*

Received date: 24-11-2016
Revised date: 23-6-2017
Accepted date: 26-6-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Combination of Physico-Chemical Entrapment and Crosslinking of Low Activity Laccase-Based Biocathode on Carboxylated Carbon Nanotube for Increasing Biofuel Cell Performance
