Title: Effect of reactor material and its reuse on photo-Fenton process efficiency at near-neutral pH: alterations in *E. coli* inactivation and resorcinol degradation kinetics in water

Authors: Angélica Varón López, Karen Herrera López, Stefanos Giannakis, Norberto Benítez

PII: S1010-6030(16)31254-0
DOI: <http://dx.doi.org/doi:10.1016/j.jphotochem.2017.04.019>
Reference: JPC 10608

To appear in: *Journal of Photochemistry and Photobiology A: Chemistry*

Received date: 31-12-2016
Revised date: 11-4-2017
Accepted date: 17-4-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Effect of reactor material and its reuse on photo-Fenton process efficiency at near-neutral pH: alterations in *E. coli* inactivation and resorcinol degradation kinetics in water
