Formation of long-lived reactive species of blood serum proteins induced by low intensity irradiation of helium-neon laser and their involvement in the generation of reactive oxygen species

Vladimir E. Ivanov, Anna M. Usacheva, Anatoly V. Chernikov, Vadim I. Bruskov, Sergey V. Gudkov

PII: S1011-1344(17)30977-6
DOI: doi: [10.1016/j.jphotobiol.2017.09.012](https://doi.org/10.1016/j.jphotobiol.2017.09.012)
Reference: JPB 10991

To appear in: *Journal of Photochemistry & Photobiology, B: Biology*

Received date: 25 July 2017
Revised date: 1 September 2017
Accepted date: 13 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Formation of long-lived reactive species of blood serum proteins induced by low intensity irradiation of helium-neon laser and their involvement in the generation of reactive oxygen species
