

## Accepted Manuscript

“Microbially and phytofabricated AgNPs with different mode of bactericidal action were identified to have comparable potential for surface fabrication of central venous catheters to combat *Staphylococcus aureus* biofilm”

Roshmi Thomas, Shiji Mathew, A.R. Nayana, Jyothis Mathews, E.K. Radhakrishnan

PII: S1011-1344(17)30175-6

DOI: doi: [10.1016/j.jphotobiol.2017.04.036](https://doi.org/10.1016/j.jphotobiol.2017.04.036)

Reference: JPB 10815

To appear in: *Journal of Photochemistry & Photobiology, B: Biology*

Received date: 6 February 2017

Revised date: ####REVISEDDATE###

Accepted date: 27 April 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

“Microbially and phytofabricated AgNPs with different mode of bactericidal action were identified to have comparable potential for surface fabrication of central venous catheters to combat *Staphylococcus aureus* biofilm”
