Title: Production and characterization of bacterial cellulose fabrics by nitrogen sources of tea and carbon sources of sugar

Author: Su Min Yim Ji Eun Song Hye Rim Kim

PII: S1359-5113(16)30244-6
DOI: <http://dx.doi.org/doi:10.1016/j.procbio.2016.07.001>
Reference: PRBI 10732

To appear in: *Process Biochemistry*

Received date: 14-3-2016
Revised date: 28-6-2016
Accepted date: 1-7-2016

Please cite this article as: Yim Su Min, Song Ji Eun, Kim Hye Rim. Production and characterization of bacterial cellulose fabrics by nitrogen sources of tea and carbon sources of sugar. *Process Biochemistry* <http://dx.doi.org/10.1016/j.procbio.2016.07.001>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
