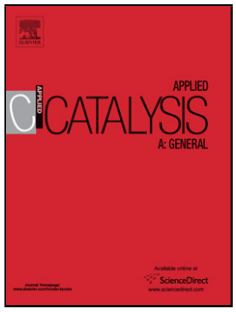
Accepted Manuscript



Title: Manipulating Ceria-Titania Binary Oxide Features and Their Impact as Nickel Catalyst Supports for Low Temperature Steam Reforming of Methane

Author: Ee Teng Kho Emma Lovell Roong Jien Wong Jason Scott Rose Amal

PII: S0926-860X(16)30558-0
DOI: http://dx.doi.org/doi:10.1016/j.apcata.2016.11.019
Reference: APCATA 16067

To appear in: *Applied Catalysis A: General*

Received date: 24-8-2016
Revised date: 11-11-2016
Accepted date: 12-11-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
