

Accepted Manuscript

Title: Hydroprocessing of Vacuum Residues: Asphaltene Characterization and Solvent Extraction of Spent Slurry Catalysts and the Relationships with Catalyst Deactivation.

Author: Cesar Ovalles Estrella Rogel Michael E. Moir Axel Brait

PII: S0926-860X(16)30621-4
DOI: <http://dx.doi.org/doi:10.1016/j.apcata.2016.12.017>
Reference: APCATA 16102

To appear in: *Applied Catalysis A: General*

Received date: 23-10-2016
Revised date: 7-12-2016
Accepted date: 19-12-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Dec. 7th, 2016

To be submitted to Applied Catalysis A: General

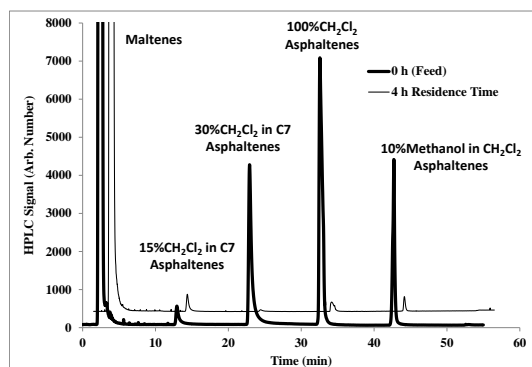

Hydroprocessing of Vacuum Residues. Asphaltene Characterization and Solvent Extraction of Spent Slurry Catalysts and the Relationships with Catalyst Deactivation.

By Cesar Ovalles, Estrella Rogel, Michael E. Moir, and Axel Brait

Chevron Energy Technology Center, Richmond, CA 94801, USA
