In situ generated Ni(0)@boehmite from NiAl-LDH: An efficient catalyst for selective hydrogenation of biomass derived levulinic acid to γ -valerolactone

Sreedhar Gundekari, Kannan Srinivasan

PII: S1566-7367(17)30351-5
DOI: doi: [10.1016/j.catcom.2017.08.020](https://doi.org/10.1016/j.catcom.2017.08.020)
Reference: CATCOM 5169

To appear in: *Catalysis Communications*

Received date: 12 June 2017
Revised date: 8 August 2017
Accepted date: 14 August 2017

Please cite this article as: Sreedhar Gundekari, Kannan Srinivasan , In situ generated Ni(0)@boehmite from NiAl-LDH: An efficient catalyst for selective hydrogenation of biomass derived levulinic acid to γ -valerolactone. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Catcom*(2017), doi: [10.1016/j.catcom.2017.08.020](https://doi.org/10.1016/j.catcom.2017.08.020)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

***In situ* generated Ni(0)@boehmite from NiAl-LDH: An efficient catalyst for selective hydrogenation of biomass derived levulinic acid to γ -valerolactone**
