Title: Enhanced catalytic ozonation for NO_x removal with CuFe₂O₄ nanoparticles and mechanism analysis

Author: Wenkai Zhao Shule Zhang Jie Ding Zhiyong Deng
Lina Guo Qin Zhong

PII: S1381-1169(16)30329-6
DOI: <http://dx.doi.org/doi:10.1016/j.molcata.2016.08.007>
Reference: MOLCAA 9994

To appear in: *Journal of Molecular Catalysis A: Chemical*

Received date: 20-2-2016
Revised date: 11-7-2016
Accepted date: 10-8-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Enhanced catalytic ozonation for NO_x removal with CuFe₂O₄ nanoparticles and mechanism analysis
