Title: Inverse relation between the catalytic activity and catalyst concentration for the ruthenium(0) nanoparticles supported on xonotlite nanowire in hydrogen generation from the hydrolysis of sodium borohydride

Author: Serdar Akbayrak Saim Özkar

PII: S1381-1169(16)30373-9
DOI: <http://dx.doi.org/doi:10.1016/j.molcata.2016.09.001>
Reference: MOLCAA 10025

To appear in: *Journal of Molecular Catalysis A: Chemical*

Received date: 16-7-2016
Revised date: 21-8-2016
Accepted date: 1-9-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Inverse relation between the catalytic activity and catalyst concentration for the ruthenium(0) nanoparticles supported on xonotlite nanowire in hydrogen generation from the hydrolysis of sodium borohydride
