

## Accepted Manuscript

Long-term stability of droplet production by microchannel (step) emulsification in microfluidic silicon chips with large number of terraced microchannels

Goran T. Vladislavljević, Ekanem E. Ekanem, Zilin Zhang, Nauman Khalid, Isao Kobayashi, Mitsutoshi Nakajima

PII: S1385-8947(17)31641-8  
DOI: <https://doi.org/10.1016/j.cej.2017.09.141>  
Reference: CEJ 17726

To appear in: *Chemical Engineering Journal*

Received Date: 10 June 2017  
Revised Date: 25 August 2017  
Accepted Date: 23 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Long-term stability of droplet production by microchannel (step) emulsification in microfluidic silicon chips with large number of terraced microchannels**
