Enhancing a multi-stage process for olive oil mill wastewater valorization towards polyhydroxyalkanoates and biogas production

Sabrina Campanari, Floriana Augelletti, Simona Rossetti, Fabio Sciubba, Marianna Villano, Mauro Majone

PII: S1385-8947(17)30259-0
DOI: <http://dx.doi.org/10.1016/j.cej.2017.02.094>
Reference: CEJ 16533

To appear in: *Chemical Engineering Journal*

Received Date: 12 October 2016
Revised Date: 18 January 2017
Accepted Date: 17 February 2017

Majone, Enhancing a multi-stage process for olive oil mill wastewater valorization towards polyhydroxyalkanoates and biogas production, *Chemical Engineering Journal* (2017), doi: <http://dx.doi.org/10.1016/j.cej.2017.02.094>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Enhancing a multi-stage process for olive oil mill wastewater valorization towards polyhydroxyalkanoates and biogas production
