Synthesis of mechanically stiff and bioactive hybrid hydrogels for bone tissue engineering applications

Anuj Kumar, Kummara Madhusudana Rao, Sung Soo Han

PII: S1385-8947(17)30232-2
DOI: <http://dx.doi.org/10.1016/j.cej.2017.02.065>
Reference: CEJ 16504

To appear in: *Chemical Engineering Journal*

Received Date: 7 November 2016
Revised Date: 10 February 2017
Accepted Date: 11 February 2017

Please cite this article as: A. Kumar, K.M. Rao, S.S. Han, Synthesis of mechanically stiff and bioactive hybrid hydrogels for bone tissue engineering applications, *Chemical Engineering Journal* (2017), doi: <http://dx.doi.org/10.1016/j.cej.2017.02.065>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Synthesis of mechanically stiff and bioactive hybrid hydrogels for bone tissue engineering applications
