

## Accepted Manuscript

Investigation of heat transfer in partially filled horizontal drums

Érika Fernanda Rezendes Tada, Andreas Bück, Fernanda Perpétua Casciotori, Evangelos Tsotsas, João Cláudio Thoméo

PII: S1385-8947(17)30132-8  
DOI: <http://dx.doi.org/10.1016/j.cej.2017.01.120>  
Reference: CEJ 16422

To appear in: *Chemical Engineering Journal*

Received Date: 16 September 2016  
Revised Date: 22 December 2016  
Accepted Date: 27 January 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**ABSTRACT**

The use and the improvement of classical mathematical models for heat transfer in particulate systems can facilitate the industrial large-scale application of rotating drums
