Core shell MoS₂/C nanospheres embedded in foam-like carbon sheets composite with an interconnected macroporous structure as stable and high-capacity anodes for sodium ion batteries

Beibei Wang, Yuan Xia, Gang Wang, Yixuan Zhou, Hui Wang

PII: S1385-8947(16)31483-8
DOI: <http://dx.doi.org/10.1016/j.cej.2016.10.073>
Reference: CEJ 15929

To appear in: *Chemical Engineering Journal*

Received Date: 7 September 2016
Revised Date: 13 October 2016
Accepted Date: 18 October 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Core shell MoS₂/C nanospheres embedded in foam-like carbon sheets composite
with an interconnected macroporous structure as stable and high-capacity
anodes for sodium ion batteries**
