Highly efficient Pd-doped aluminate spinel catalysts with different divalent cations for the selective catalytic reduction of NO with H₂ at low temperature

Chaochao Xu, Wei Sun, Limei Cao, Tingting Li, Xuanxuan Cai, Ji Yang

PII: S1385-8947(16)31361-4
DOI: <http://dx.doi.org/10.1016/j.cej.2016.09.119>
Reference: CEJ 15829

To appear in: *Chemical Engineering Journal*

Received Date: 19 March 2016
Revised Date: 20 September 2016
Accepted Date: 23 September 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highly efficient Pd-doped aluminate spinel catalysts with different divalent cations for the selective catalytic reduction of NO with H₂ at low temperature
