Title: Mixture Semisupervised Probabilistic Principal Component Regression Model with Missing Inputs

Author: Shabnam Sedghi Anahita Sadeghian Biao Huang

PII: S0098-1354(17)30140-0

DOI: <http://dx.doi.org/doi:10.1016/j.compchemeng.2017.03.015>

Reference: CACE 5765

To appear in: *Computers and Chemical Engineering*

Received date: 16-7-2016

Revised date: 15-12-2016

Accepted date: 17-3-2017

Please cite this article as: Shabnam Sedghi, Anahita Sadeghian, Biao Huang, Mixture Semisupervised Probabilistic Principal Component Regression Model with Missing Inputs, *Computers and Chemical Engineering* (2017), <http://dx.doi.org/10.1016/j.compchemeng.2017.03.015>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

1. Mixture semi-supervised probabilistic PCR model is extended to a general modeling solution;
2. The problem of missing data in both input and output is addressed;
3. The validity and performance for soft sensor design are demonstrated through examples including the benchmark TE process.
