This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

A location-inventory-pricing model in a closed loop supply chain network with correlated demands and shortages under a periodic review system

Elham Ahmadzadeh, Behnam Vahdani[1]

Faculty of Industrial and Mechanical Engineering, Qazvin Branch, Islamic Azad University, Qazvin, Iran

Highlights

- Presenting a model in a closed loop supply chain contains facility location, inventory control, and pricing decisions.
- Considering correlated demand across the customer zones in the proposed model
- Applying periodic review inventory policy at CDCs in this network
- Presenting encoding and decoding procedures for representing solutions of this problem
