Title: Process Operational Safety Using Model Predictive Control Based on a Process Safeness Index

Author: Fahad Albalawi Helen Durand Panagiotis D. Christofides

PII: S0098-1354(17)30170-9
DOI: <http://dx.doi.org/doi:10.1016/j.compchemeng.2017.04.010>
Reference: CACE 5784

To appear in: *Computers and Chemical Engineering*

Received date: 10-2-2017
Revised date: 14-3-2017
Accepted date: 6-4-2017

Please cite this article as: Fahad Albalawi, Helen Durand, Panagiotis D. Christofides, Process Operational Safety Using Model Predictive Control Based on a Process Safeness Index, *Computers and Chemical Engineering* (2017), <http://dx.doi.org/10.1016/j.compchemeng.2017.04.010>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A systems view of process safety is quantified via a safeness-index concept.
- Model predictive control formulations based on safeness-index are presented.
- Closed-loop system stability is rigorously established.
- Implementation and evaluation of the method using a chemical process system.
