Title: Product-centric Continuous-time Formulation for Pipeline Scheduling

Authors: Pedro M. Castro, Hossein Mostafaei

PII: S0098-1354(17)30186-2
DOI: <http://dx.doi.org/doi:10.1016/j.compchemeng.2017.04.023>
Reference: CACE 5801

To appear in: *Computers and Chemical Engineering*

Received date: 1-2-2017
Revised date: 18-4-2017
Accepted date: 27-4-2017

Please cite this article as: Castro, Pedro M., & Mostafaei, Hossein., Product-centric Continuous-time Formulation for Pipeline Scheduling. *Computers and Chemical Engineering* <http://dx.doi.org/10.1016/j.compchemeng.2017.04.023>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Product-centric Continuous-time Formulation for Pipeline Scheduling

Pedro M. Castro^{a,} and Hossein Mostafaei^{a,b}*

^a Centro de Matemática Aplicações Fundamentais e Investigação Operacional, Faculdade de Ciências, Universidade de Lisboa, 1749-016 Lisboa, Portugal.

^b Department of Applied Mathematics, Azarbaijan Shahid Madani University, Tabriz, Iran

- >Simple scheduling formulation for straight multiproduct pipelines
- >New constraints to model first in, first out policy in pipeline segments
- >A product can reenter a segment after completely leaving on the other side
- >Forbidden sequences enforced even when segments become idle between products injections
- >New best solution for a literature benchmark problem.
