Title: Scope and limitations of the irreversible thermodynamics and the solution diffusion models for the separation of binary and multi-component systems in reverse osmosis process

Authors: M.A. Al-Obaidi, C. Kara-Zaitri, I.M. Mujtaba

PII: S0098-1354(17)30057-1
DOI: <http://dx.doi.org/doi:10.1016/j.compchemeng.2017.02.001>
Reference: CACE 5704

To appear in: *Computers and Chemical Engineering*

Received date: 7-10-2016
Revised date: 5-1-2017
Accepted date: 1-2-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Scope and limitations of the irreversible thermodynamics and the solution diffusion models for the separation of binary and multi-component systems in reverse osmosis process

M. A. Al-Obaidi ^{1,2}, C. Kara-Zaitri ¹ and I. M. Mujtaba^{1*}
