Title: A Widely Applicable Tool for Modeling Precipitation Processes

Author: M. Haderlein Andreas Güldenpfennig D. Segets W. Peukert

PII: S0098-1354(16)30401-X
DOI: <http://dx.doi.org/doi:10.1016/j.compchemeng.2016.12.007>
Reference: CACE 5642

To appear in: *Computers and Chemical Engineering*

Received date: 10-8-2016
Revised date: 23-11-2016
Accepted date: 11-12-2016

Please cite this article as: Haderlein, M., Güldenpfennig, Andreas., Segets, D., & Peukert, W., A Widely Applicable Tool for Modeling Precipitation Processes. *Computers and Chemical Engineering* <http://dx.doi.org/10.1016/j.compchemeng.2016.12.007>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

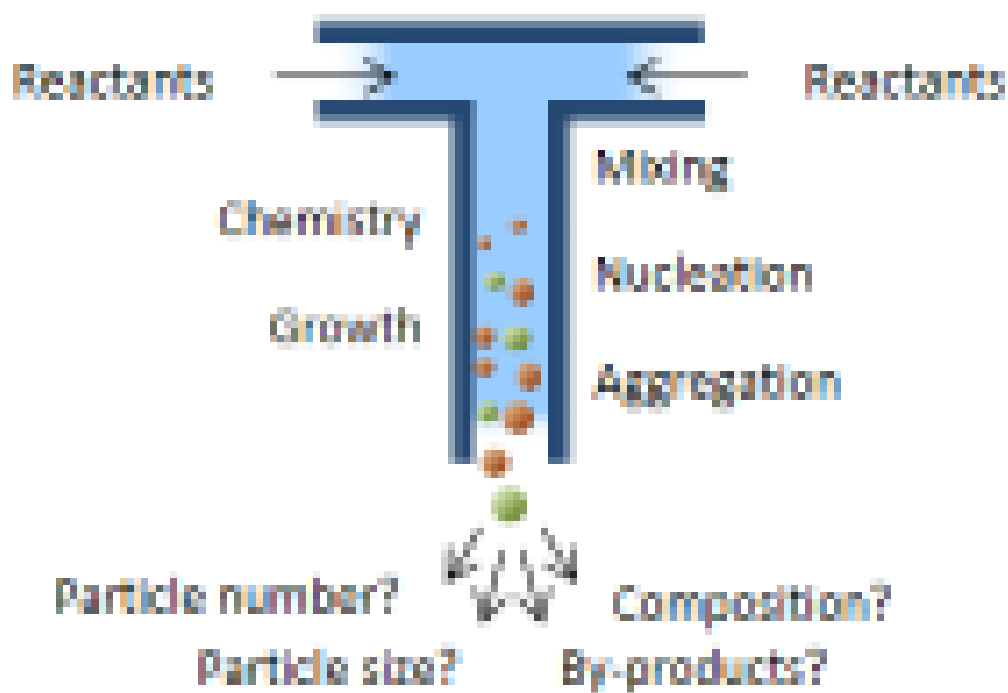

A Widely Applicable Tool for Modeling Precipitation Processes

M. Haderlein^{1,2}, Andreas Güldenpfennig^{1,2}, D. Segets^{1,2}, W. Peukert^{1,2}

1: Institute of Particle Technology (LFG), Friedrich-Alexander-University Erlangen-Nürnberg (FAU), Cauerstraße 4, 91058 Erlangen, Germany

2: Interdisciplinary Center for Functional Particle Systems (FPS), Friedrich-Alexander-Universität Erlangen-Nürnberg (FAU), Haberstraße 9a, 91058 Erlangen

Graphical abstract

Highlights

- Tool for efficient modeling of precipitation processes
- Improved description of mixing, ion complexation and solid formation
- Arbitrary number of solid phases possible
