Chiral macrocyclic imine nickel(II) coordination complexes with diverse photophysical properties

Chunyu Liu, Yanling Si, Guochun Yang, Xiumei Pan

PII: S0143-7208(16)30947-0

DOI: [10.1016/j.dyepig.2017.01.006](https://doi.org/10.1016/j.dyepig.2017.01.006)

Reference: DYPI 5705

To appear in: *Dyes and Pigments*

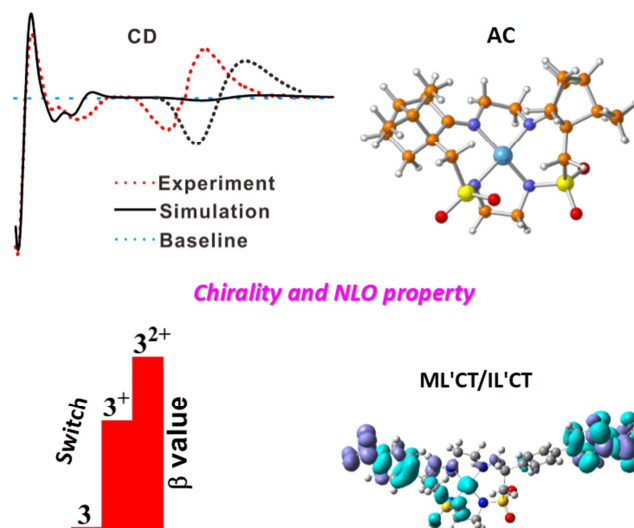

Received Date: 13 October 2016

Revised Date: 1 December 2016

Accepted Date: 3 January 2017

Please cite this article as: Liu C, Si Y, Yang G, Pan X, Chiral macrocyclic imine nickel(II) coordination complexes with diverse photophysical properties, *Dyes and Pigments* (2017), doi: 10.1016/j.dyepig.2017.01.006.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The structure-property relationships of second-order NLO properties of chiral complexes were established with the aid of the DFT calculations.
