Title: Hydrostatic pressure effects on the kinetic parameters of hydrogen evolution and permeation in Armco iron

Authors: X.L. Xiong, H.X. Ma, X. Tao, J.X. Li, Y.J. Su, Q.J. Zhou, Alex A. Volinsky

PII: S0013-4686(17)32052-2
DOI: <https://doi.org/10.1016/j.electacta.2017.09.181>
Reference: EA 30380

To appear in: *Electrochimica Acta*

Received date: 11-7-2017
Revised date: 22-9-2017
Accepted date: 28-9-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Hydrostatic pressure effects on the kinetic parameters of hydrogen evolution and permeation in Armco iron
