Accepted Manuscript

A milliliter-scale setup for the efficient characterization of isothermal vapor-liquid equilibria using Raman spectroscopy

Bastian Liebergesell, Carsten Flake, Thorsten Brands, Hans-Jürgen Koß, André Bardow

PII: S0378-3812(17)30161-9

DOI: 10.1016/j.fluid.2017.04.014

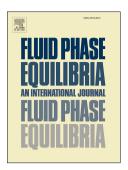

Reference: FLUID 11462

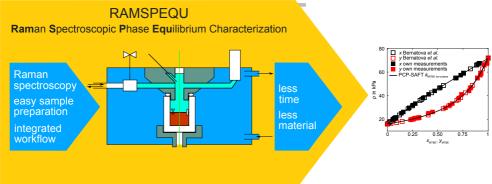

To appear in: Fluid Phase Equilibria

Received Date: 15 March 2017
Revised Date: 20 April 2017
Accepted Date: 23 April 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
