Title: Residual Aluminum Control for Source Water with High Risk of Overproof Coagulant Residue: A Novel Application of Principal Component Analysis

Authors: Min Ma, Junnong Gu, Yuxian Li, Min Wang

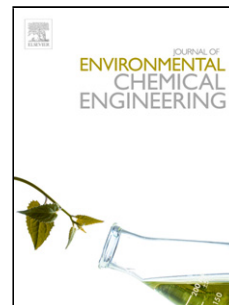

PII: S2213-3437(17)30198-7
DOI: <http://dx.doi.org/doi:10.1016/j.jece.2017.05.008>
Reference: JECE 1611

To appear in:

Received date: 19-1-2017
Revised date: 25-4-2017
Accepted date: 4-5-2017

Please cite this article as: Min Ma, Junnong Gu, Yuxian Li, Min Wang, Residual Aluminum Control for Source Water with High Risk of Overproof Coagulant Residue: A Novel Application of Principal Component Analysis, Journal of Environmental Chemical Engineering <http://dx.doi.org/10.1016/j.jece.2017.05.008>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Residual Aluminum Control for Source Water with High Risk of Overproof Coagulant Residue: A Novel Application of Principal Component Analysis
