

## Accepted Manuscript

Title: Influence of activated carbon surface oxygen functionality on elemental mercury adsorption from aqueous solution

Authors: Emily K. Faulconer, David W. Mazyck

PII: S2213-3437(17)30227-0  
DOI: <http://dx.doi.org/doi:10.1016/j.jece.2017.05.036>  
Reference: JECE 1639

To appear in:

Received date: 23-11-2016  
Revised date: 23-5-2017  
Accepted date: 24-5-2017

Please cite this article as: Emily K.Faulconer, David W.Mazyck, Influence of activated carbon surface oxygen functionality on elemental mercury adsorption from aqueous solution, Journal of Environmental Chemical Engineering <http://dx.doi.org/10.1016/j.jece.2017.05.036>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Influence of activated carbon surface oxygen functionality on elemental mercury adsorption from aqueous solution**
