Title: Deciphering Pretreatment-induced Repartition among Stratified Extracellular Biopolymers and its Effect on Anaerobic Biodegradability and Dewaterability of Waste Activated Sludge

Authors: Fan Lü, Fang Wang, Liming Shao, Pinjing He

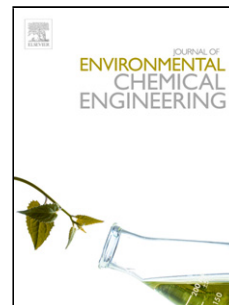

PII: S2213-3437(17)30238-5
DOI: <http://dx.doi.org/doi:10.1016/j.jece.2017.05.047>
Reference: JECE 1650

To appear in:

Received date: 27-3-2017
Revised date: 15-5-2017
Accepted date: 28-5-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Deciphering Pretreatment-Induced Repartition among Stratified Extracellular Biopolymers and its Effect on Anaerobic Biodegradability and Dewaterability of Waste Activated Sludge

† These authors contribute equally to the work.

Author contribution

Fan Lü designed the experimental system, worked on the data analysis, wrote the manuscript.

Fang Wang worked on the experiments, analyzed data and wrote the manuscript.

Liming Shao was involved in the result analysis and discussion of experimental data.

Pinjing He organized the research and paper preparation.
