

## Accepted Manuscript

Title: Chemically treated eggshell wastes as a heterogeneous and eco-friendly catalyst for oximes preparation

Authors: Mohamed Ait Taleb, Rachid Mamouni, Maryam Ait Benomar, Abdelhamid Bakka, Abdelmalek Mouna, Mohamed Labd Taha, Abdeljalil Benlhachemi, Bahcine Bakiz, Sylvie Villain

PII: S2213-3437(17)30060-X  
DOI: <http://dx.doi.org/doi:10.1016/j.jece.2017.02.009>  
Reference: JECE 1475

To appear in:

Received date: 5-9-2016  
Revised date: 12-1-2017  
Accepted date: 4-2-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- A preparation and characterization of CTE and CTEC<sub>800</sub> catalysts were described.
- CTE and CTEC<sub>800</sub> can be used as eco-friendly and cost-effective catalysts.
- CTE and CTEC<sub>800</sub> catalysts led to the desired product in good to excellent yields.
- CTE and CTEC<sub>800</sub> catalysts can be reused up to seven times.
