Pea protein-fortified extruded snacks: Linking melt viscosity and glass transition temperature with expansion behaviour

Claudia Philipp, M. Azad Emin, Roman Buckow, Pat Silcock, Indrawati Oey

PII: S0260-8774(17)30360-6
DOI: 10.1016/j.jfoodeng.2017.08.022
Reference: JFOE 8997
To appear in: *Journal of Food Engineering*
Received Date: 19 December 2016
Revised Date: 12 June 2017
Accepted Date: 21 August 2017

Please cite this article as: Claudia Philipp, M. Azad Emin, Roman Buckow, Pat Silcock, Indrawati Oey, Pea protein-fortified extruded snacks: Linking melt viscosity and glass transition temperature with expansion behaviour, *Journal of Food Engineering* (2017), doi: 10.1016/j.jfoodeng.2017.08.022

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Pea protein-fortified extruded snacks: Linking melt viscosity and glass**
2 **transition temperature with expansion behaviour**
