Potential application of high pressure homogenization (HPH) for improving functional and rheological properties of mechanically deboned chicken meat (MDCM) proteins

Furkan Turker Saricaoglu, Osman Gul, Serpil Tural, Sadettin Turhan

PII: S0260-8774(17)30327-8
DOI: 10.1016/j.jfoodeng.2017.07.029
Reference: JFOE 8971
To appear in: *Journal of Food Engineering*
Received Date: 03 April 2017
Revised Date: 10 July 2017
Accepted Date: 28 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Running title: Protein modification with high pressure homogenization**
2 **Potential application of high pressure homogenization (HPH) for improving functional**
3 **and rheological properties of mechanically deboned chicken meat (MDCM) proteins**
