Effects of water and maltodextrin on the glass transition temperature of freeze-dried mango pulp and an empirical model to predict plasticizing effect of water on dried fruits

Suwalee Fongin, Kiyoshi Kawai, Nathdanai Harnkarnsujarit, Yoshio Hagura

PII: S0260-8774(17)30180-2

DOI: [10.1016/j.jfoodeng.2017.04.025](https://doi.org/10.1016/j.jfoodeng.2017.04.025)

Reference: JFOE 8861

To appear in: *Journal of Food Engineering*

Received Date: 19 December 2016

Revised Date: 18 April 2017

Accepted Date: 21 April 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 Effects of water and maltodextrin on the glass transition temperature of freeze-dried mango
2 pulp and an empirical model to predict plasticizing effect of water on dried fruits
