Application of airborne ultrasonic technology in the food industry

Clémentine M.G. Charoux, Kumari Shikha Ojha, Colm P. O'Donnell, Andrea Cardoni, Brijesh K. Tiwari

PII: S0260-8774(17)30140-1
DOI: 10.1016/j.jfoodeng.2017.03.030
Reference: JFOE 8834
To appear in: *Journal of Food Engineering*
Received Date: 08 December 2016
Revised Date: 28 March 2017
Accepted Date: 29 March 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Research highlights

1. Airborne acoustic ultrasound as an emerging food processing technology
2. Equipment and systems of non-contact transducers
3. Applications in the food industry: drying, defoaming and inactivation of microorganisms – review and mechanisms
4. Processing and application challenges
