

Accepted Manuscript

Title: Heat transfer and venting rate during controlled decompression of supercritical extraction vessels

Author: Eduardo A. Richter M. Soledad Murias José M. del Valle

PII: S0896-8446(16)30151-6
DOI: <http://dx.doi.org/doi:10.1016/j.supflu.2016.05.040>
Reference: SUPFLU 3665

To appear in: *J. of Supercritical Fluids*

Received date: 22-12-2015
Revised date: 15-4-2016
Accepted date: 30-5-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Heat transfer and venting rate during controlled decompression of supercritical extraction vessels

Eduardo A. Richter,¹ M. Soledad Murias,¹ and José M. del Valle^{1*}
