Modeling the hydrodynamics of downer reactors based on the meso-scale structure

Wenming Liu, Hongzhong Li, Qingshan Zhu

PII: S0032-5910(16)30671-4
DOI: doi: [10.1016/j.powtec.2016.09.087](https://doi.org/10.1016/j.powtec.2016.09.087)
Reference: PTEC 11997

To appear in: *Powder Technology*

Received date: 25 May 2016
Revised date: 9 September 2016
Accepted date: 30 September 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Modeling the hydrodynamics of downer reactors based on the meso-scale
structure**
